Golden Wok Food Delivery: Executive Overview

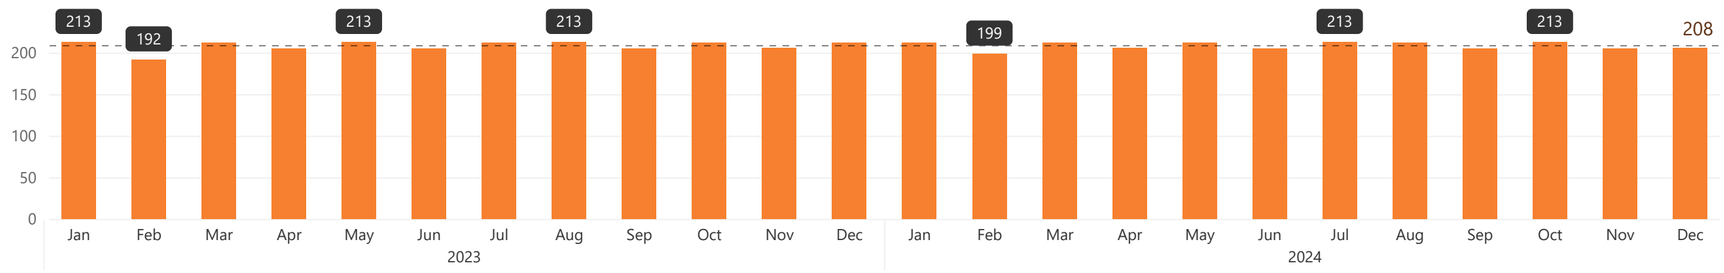

Executive Overview | Delivery & SLA Performance | Profitability & Corridors | Kitchen & Zone

Order Volume	Order Value	Profit Margin %	SLA Breach Rate %	Avg Profit per Order
5,000	₦380.56M	0.65%	50%	₦497.70
Across 4 kitchens | 20 zones | 60 riders	₦2,488,509 profit on ₦380,562,568 revenue	0.00% ▼ vs prior year	2497 of 5000 orders breached SLA 0.74% ▲ vs prior year	₦3.30 ▼ vs prior year

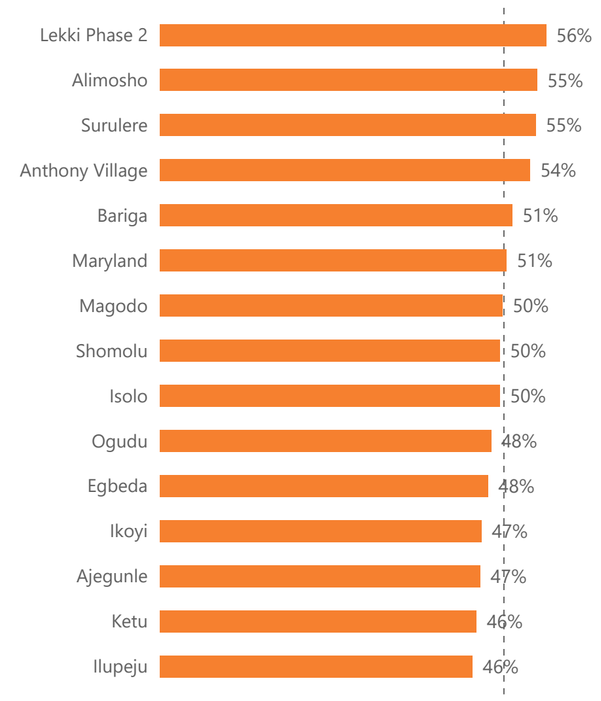

Monthly orders is steady, 0% year over year, with an average order volume of 208 per month

Demand is steady, there is no seasonal surge to plan capacity around

Order Volume | Total Profit

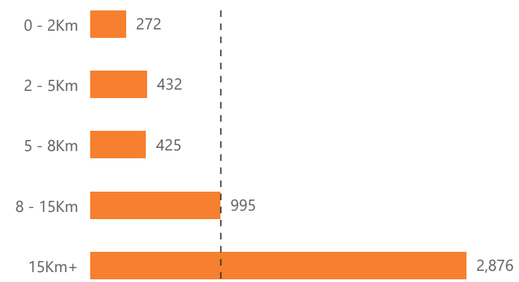

Lekki Phase 2 is highest at 56.35%, while Ilupeju is lowest at 45.63%

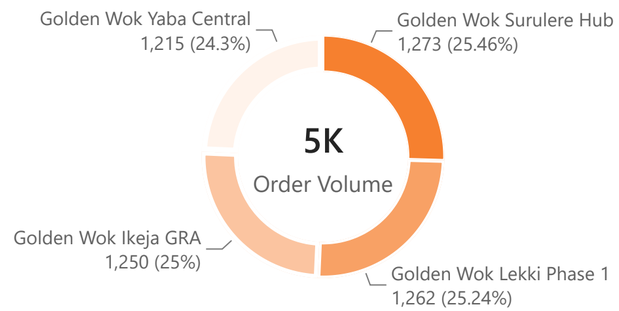

15Km+ makes up 58% of all orders, the largest single band

Ensure rider capacity is weighted toward long-distance routes

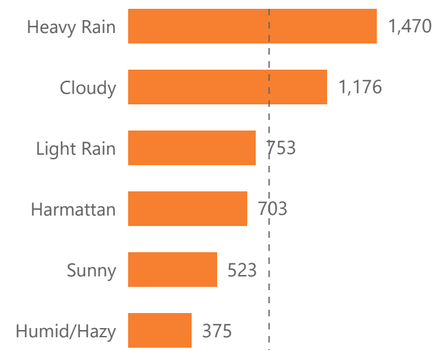

Order volume is evenly split across all 4 kitchens

No kitchen is over or under-loaded relative to the others

Heavy Rain days see the most orders, Humid/Hazy the least

This reflects how often each condition occurred, not a demand driver.

⚠ The Profit margin is very small at only 0.65%

Recommendation: Raise order value or lower delivery cost across business.

⚠ **Breach rates vary by 10.71% across zones. But the reason is not fully explained by rush hour, weather, or zone tier alone.**

Hover on the bars to see what's driving it. ↗

Golden Wok Food Delivery: Delivery & SLA Performance

Median Delivery Delay
0.00 mins
Average runs -5 min. Both the average and the typical order sit right around zero, no real lean toward early or late delivery

Rush Hour Breach Gap (pp)
-1%
Rush hour 49.5% vs off-peak 50.5%

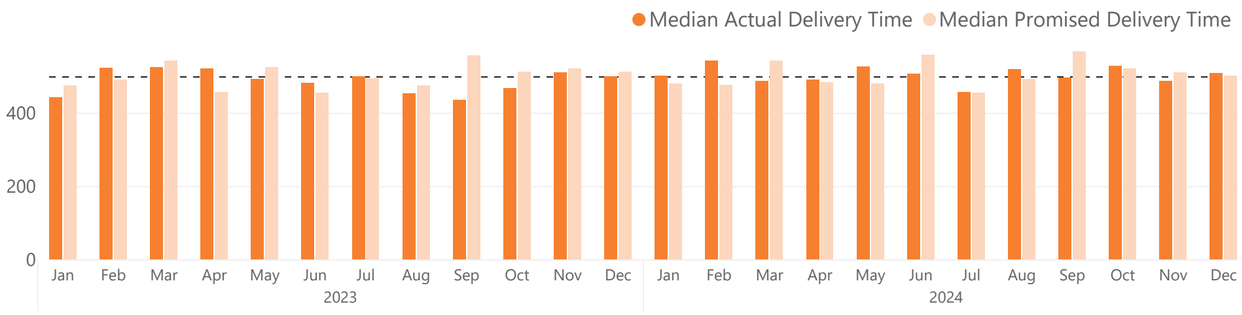

Weather Delay Gap (min)
40 mins
Heavy rain avg 1 mins vs Sunny avg -39 mins

Outer Ring Breach Gap (pp)
0.11%
Outer ring 50.0% vs other zones 49.9%

Half of orders miss their promised delivery time.

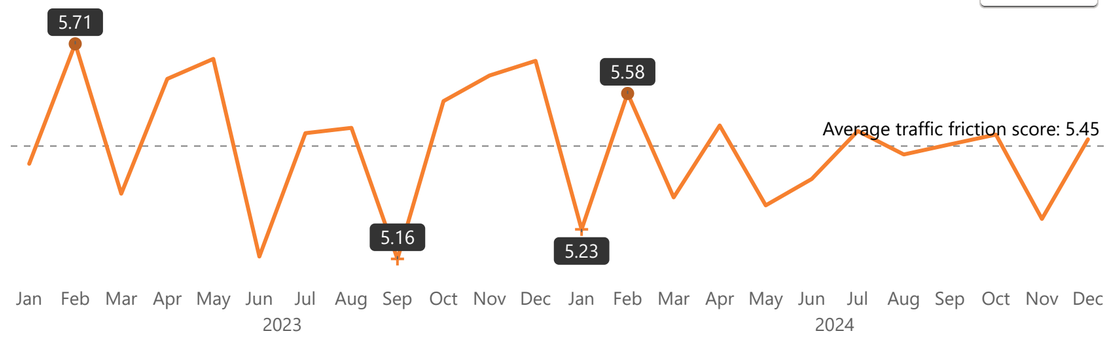

Actual 497 min vs promised 503 min

Month

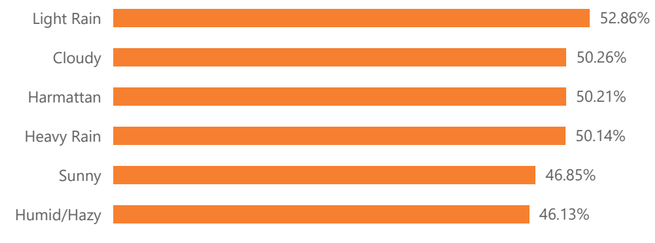

Traffic Friction is flat, averaging 5.4/10 this year

Year: All

Light Rain has the highest breach and Humid/Hazy at lowest, but the gap is too small to point to weather as the delay cause

Orders via bicycle are breached the most

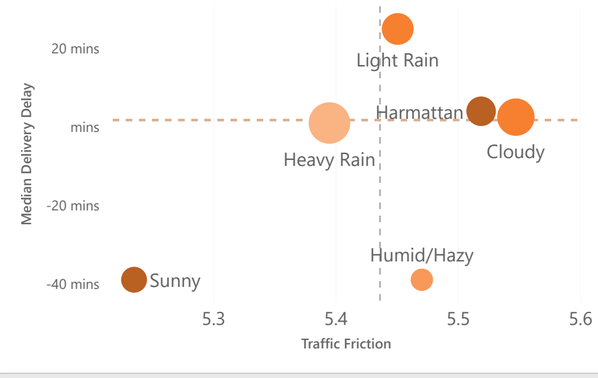

Ratings barely differ between on-time and late orders

Traffic friction and delivery delay show no consistent link across weather types

There are less orders on humid/hazy days

⚠ **Promised vs actual delivery delay changes a lot by zone. Lekki Phase 2 misses 56% of the time while Ilupeju misses by 46%. Rush hour, weather, and zone tier did not explain the gap.**

More specific operational data(route conditions, access issues) needs to be collected for these zones
